## **Academic Project**

Online Doctor Appointment Webapp | MCA 1st yr |

**Technologies:** Core Java (Servlet, Jsp, JDBC)

IDE: Eclipse for Enterprise | Database: MySQL

The application allows patients to register and create their profiles providing necessary personal and medical information. Once registered, patients can log in to the system and fill the appointment form for appointment, the web application provides a personalized dashboard where they can manage their schedules, view upcoming appointments.

Online Food Ordering System | BBA(CA) |
Technologies: HTML, CSS, PHP | Database: MySQL

An online food ordering system allows your business to accept and manage orders placed online for delivery or takeaway. Customers browse a digital menu, on a website and place and pay for their order online
